No. 7300026

THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Asgrow Seed Company

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF seventeen YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

BEAN

'Bush Blue Lake Supreme'

In Testimony Whereof, *I have hereunto set my hand and caused the seal of the* Plant Variety Protection Office *to be affixed at the City of* Washington *this* 24th *day of* June *in the year of our Lord one thousand nine hundred and* seventy-four

Attest:

Commissioner
Plant Variety Protection Office
Grain Division
Agricultural Marketing Service

Secretary of Agriculture

Exhibit A Origin and Breeding History

Bean Bush Blue Lake Supreme PV#73026

Bush Blue Lake Supreme originated in 1964 from a cross between Stringless Blue Lake S7, a pole variety, and Bush Blue Lake 272. In the period 1965-1967 -- from F2 through F4 -- single plant selections were made. In 1967-1969 both mass and single plant selections were made and in 1969 first trial evaluations were begun. In 1970 progenies were tested for trueness to type and some progenies were bulked as basic seed stock. The experimental designation XP B41 was applied. The first major seed stock increase was made in 1971 and more extensive trials were conducted. Trials were continued in 1972 and additional seed stock increases were made. The variety was named Bush Blue Lake Supreme.

During the later part of the history of this variety it was concluded that the variety was uniform and stable in type. The variety shows a normal rate of mutation to flat podded rogues and hard points or strings. No other rogue type has appeared on a consistent basis.

#73026

EXHIBIT A

ORIGIN AND BREEDING HISTORY OF THE VARIETY

BEAN - Bush Blue Lake Supreme

Asgrow Seed Company
November 3, 1972

Developed by Asgrow Seed Company

1964 - Original Cross - Stringless Blue Lake - S7 x Bush Blue Lake 272

1964 - F_1 produced

1965 - F_2 grown and selections made

1966 - F_3 grown and selections made

1967 - F_4 grown and selections made

1968 - F_5 mass selected

1969 - F_6 mass selected - Entered in yield trials

1970 - Progeny tested for trueness to type and progenies bulked for Breeders seed. Yield trials. Designated as XP-B41 in January 1970.

1971 - Grew first increase. Yield trials at Asgrow Research Center and at other stations.

1972 - Grew additional increase, yield trials and also sampled to processors. Named Bush Blue Lake Supreme.

During the various generations listed above careful field observations were made. During the later part of the history of this variety's development it was concluded the variety was stable. Variations amounting to less than 0.1% for flat pod, a normal mutation in all round podded varieties, may be encountered.

Asgrow Seed Company ~~9620-190-1~~
9620-190-1
Kalamazoo, Michigan 49001

13. CHECK BOX BELOW FOR EACH ATTACHMENT SUBMITTED:

- [X] 12A. Exhibit A, Origin and Breeding History of the Variety *(See Section 52, P.L. 91-577)*
- [X] 12B. Exhibit B, Botanical Description of the Variety
- [X] 12C. Exhibit C, Objective Description of the Variety
- [X] 12D. Exhibit D, Data Indicative of Novelty
- [X] 12E. Exhibit E, Statement of the Basis of Applicant's Ownership

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable. *(See Section 52, P.L. 91-577).*

14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? *(See Section 83(a), P.L. 91-577) (If "Yes," answer 14B and 14C below.)* [ ] YES [X] NO

14B. Does the applicant(s) specify that this variety be limited as to number of generations?	14C. If "Yes," to 14B, how many generations of production beyond breeder seed?
[ ] YES [X] NO	N/A

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act (P.L. 91-577).

Exhibit B Botanical Description of the Variety

Bean Bush Blue Lake Supreme PV#73026

Bush Blue Lake Supreme is a green podded snapbean in the Bush Blue Lake class. The variety is widely adapted and has a range equivalent to Bush Blue Lake 274. It is adapted to mechanical harvest. It is earlier than Bush Blue Lake 274 and is the earliest of the Bush Blue Lake class, being several days earlier than BBL 274. As usual with this class maturity is somewhat difficult to define depending upon the method of determination used. Seed length determinations indicate that Bush Blue Lake Supreme is 3-4 days earlier than Bush Blue Lake 274. The plant is a determinate, erect bush with less tendency to sprawl at maturity than Bush Blue Lake 274. Plant height averages about 39 cm with a 49 cm spread. There are about five branches per plant and habit is compact. Flowers and pods are set high and concentrated. Leaves are wrinkled, dull, medium green and are of average thickness. Leaves are large; slightly pubescent, and taper pointed.

Pods are dark green, sparsely pubescent, slightly curved, generally free of constrictions, dull, and smooth. Pods are 14 cms long, 90 mm wide, and 96 mm thick and they are round in cross section tending to creaseback with maturity although not as markedly so as many other varieties. Pod flesh is dark and firm. The slow rate of seed development together with firm flesh contributes to the high quality of the pod even in larger sieve sizes. The pods are stringless and with low fiber. Spurs are about 16 mm and slightly curved. The variety is adapted to machine harvest.

Seed are white and free from other colors. There is no hilar ring. Seed are elliptical, kidney shaped, and round in cross section. Seed are large - 100 seed weighing 31 grms. Seed are 13 mm long, 6 mm wide, and 6 mm in thickness on an average.

Bush Blue Lake Supreme is resistant to common and NY 15 strains of bean virus 1. It appears to have some tolerance to heat.

Exhibit D Data Indicative of Novelty

Bean Bush Blue Lake Supreme PV#73026

Bush Blue Lake Supreme most nearly resembles Bush Blue Lake 274 but is distinguished from that variety by maturity, being 3-4 days earlier.

Bush Blue Lake Supreme has a somewhat more erect bush which approaches Tendercrop in type. However, at maturity both varieties tend to sprawl due to the weight of the pods. Pods are ~~slightly~~ RJS shorter and thicker than Bush Blue Lake 274.

STATEMENT OF THE BASIS OF APPLICANTS OWNERSHIP

BEAN - Bush Blue Lake Supreme

Asgrow Seed Company
November 3, 1972

The new plant variety, Bush Blue Lake Supreme, was developed under the instigation, support and corporate objectives of Asgrow Seed Company (a subsidiary of The Upjohn Company) utilizing contributive parent stocks and facilities owned or controlled by the company.
